**DETAILED ACTION**

1. Claims 1-15 are pending in the application and are currently subject to the following restriction.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-15, insofar as the claims are drawn to an antibody or conjugate or derivative thereof that binds a polypeptide having an amino acid sequence that is at least 80% identical to the amino acid sequence set forth in SEQ ID NO: 5, classified in class 530, subclass 387.9+.

Group II. Claims 1-15, insofar as the claims are drawn to an antibody or conjugate or derivative thereof that binds a polypeptide having an amino acid sequence that is at least 80% identical to the amino acid sequence set forth in SEQ ID NO: 6, classified in class 530, subclass 387.9+.

Group III. Claims 1-15, insofar as the claims are drawn to an antibody or conjugate or derivative thereof that binds a polypeptide having an amino acid sequence that is at least 80% identical to the amino acid sequence set forth in SEQ ID NO: 7, classified in class 530, subclass 387.9+.

Group IV. Claims 1-15, insofar as the claims are drawn to an antibody or conjugate or derivative thereof that binds a polypeptide having an amino acid sequence that is at least 80% identical to the amino acid sequence set forth in SEQ ID NO: 8, classified in class 530, subclass 387.9+.

3. The inventions are distinct, each from the other because of the following reasons:

The inventions in groups I-IV are disclosed as biologically and chemically distinct, unrelated in structure and/or function, and/or made by and/or used in different methods, and therefore the claimed products are distinct.

4. Because these inventions are distinct for the reasons given above and also because the search required for any one group is not required for any other group and/or the inventions have acquired a separate status in the art as shown by their different classification or their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Claims 1, 7, and 9 are generic to a plurality of disclosed patentably distinct species comprising an antibody conjugated to a cytotoxic agent, wherein said agent is a toxin selected from the group consisting of (a) maytansinoid and (b) calicheamicin. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

**Conclusion**

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Rawlings, Ph.D. whose telephone number is (703) 305-3008. The examiner can normally be reached on Monday-Friday, 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony C. Caputa, Ph.D. can be reached on (703) 308-3995.
